

Experience

Surestart Nursery

Address: Heckmondwike, West Yorkshire
Architects: Firth Partnership, Barnsley
Value: £1.2M
Project Term: February 2005 to October 2005
Project: Construct New Building

Description

This National Children's Home funded project required the construction of a two storey building consisting of reception area, meeting rooms, kitchen, play area, sensory room and nursery on the ground floor with offices upstairs and child friendly interactive play area outside.

The building was to be erected on an old quarry site so Torpoint Limited conducted grouting to voids below site and ground stabilisation works prior to casting the concrete raft for the ground floor. Then works progressed to slab, reconstructed stone/brickwork extension, cavity walls, pre-cast concrete for the upper floors with concrete block work internal partitions.

Surestart Nursery

Address: Elland, Halifax, West Yorkshire
Architects: JH Langtry-Langton
Value: £500k
Project Term: December 2005 to July 2006
Project: Construct New Building

Description

Calderdale Primary Care required Torpoint to construct a new Surestart Centre to support the local community. The centre is annexed to Ellands Church of England School Nursery so it was critical to minimise disruption to the School and ensure health & safety remained top priority throughout the build as the school remained open to pupils, parents, teachers and the general public throughout. The project was delivered on time and on budget.
