## HART Unit for The YAS

**Address:** Yorkshire Ambulance Service - Leeds  
**Architects:** EC Harris  
**Value:** £2.3m  
**Project Term:** 22 weeks  
**Project:** Refurb of the HART unit  
**Client:** NHS

## Description of Works

This contract was for the NHS – YAS, the Hazardous Area Response Team.

The HART unit staff are specifically trained to deal with major incidents, these may be chemical, nuclear, biological or explosives, or other major incidents i.e. train crashes, large scale motorway accident, building collapses or significant fires and floods.

The existing building was a major refurbishment with an initial value of £1.7m over a 16 week period; however this was quickly increased to £2.3m over 22 weeks, as additional funding was obtained for essential works in and around the existing warehouse.

We are extremely proud to be involved in such a special project and hope in some way we have made a small contribution to the people of West Yorkshire.
